H, Physics H, English  
9 G, English 10 G,  
English 11 H.

### ABOUT MYSELF

I am a 16-year-old high school student who wants to become an architect. I want to be able to get into a very good architecture college, so that I have the opportunity to learn what I love. Everything that I have been learning and experiencing is preparing me for what the world is going to bring my way.

### EXPERIENCE

#### American Sign Language | 2022-2024

Foreign Language

I have been studying ASL for two years now. And I have learned so much from my teachers and classmates alike. I wish we had more ASL classes at my school that I could learn for longer. I am very grateful for these two years of learning ASL.

#### Center for Advanced Research and Technology | 2023-2024

Web application development

I have learned many skills here, including HTML, CSS, JavaScript, Figma and many more. My one year here has been really useful for my presentation skills, and being able to present confidently without trouble.

### HOBBIES

- Reading
- Sketching
- Painting
- Fashion
- Gaming
- Writing
- Design

### EDUCATION

#### 2021-2025

##### Hoover Highschool

I have been a student at Hoover Highschool for about 4 years now, and I have learned so much from being here and being able to learn with the other students and teachers. It's a great environment.

#### 2023-2024

##### CART

The Center for Advanced Research and Technology is a very nice learning environment for students. It's a very work-oriented environment so that we can get a feel of a more formal setting.
